EM-G1.6

EM-G1.6 DIAPHRAGM GAS METER

Diaphragm gas-meters are designed for measuring the consumption of natural gas, town gas, LPG.

Gas-meters are characterized by:

- high measuring accuracy,
- · long lasting metrological stability,
- silent and failsafe working.

Features/Technical specification

| Туре | Volume (dm3) | Range (m3/h) | Connector* | Weight (kg) |
|---------|--------------|--------------|-------------------------------|-------------|
| EM-G1,6 | 1,2 | 0,016÷2,5 | G 5/4" DN 32 or 3/4" DN 20 | 2 |

(*) On special request it is possible to provide gas meters with different types of connector

EM type gas meter has full protection against any external factors.

It is equipped with:

- anti-burglar counter,
- non collapsible counter housing (optional),
- protection against introducing objects that may block the counter,
- lead seal assuring protection against the interferences and deteriorations,
- measuring set made of plastic for protection against using the neodymium magnets.

Counter has a possibility of assembling low frequency, reed relay impulse reader LF (optional).
