

Detailed description

The EM-EVDC2 charger is designed as compact metal cabinet which can be placed on a foundation basis or as a mobile version equipped with wheels. The front side of the charger is equipped with a user interface in the form of LED indicators, an emergency shutdown button and a key switch or an RFID reader. The side walls are equipped with ventilation openings. The electric apparatus of the charger is placed on the supporting construction inside the enclosure. All walls have openable covers that allow access to the inside of the charger. AC cable inlet is provided on the bottom of the charger.
